

Laptop that has both USB and HDMI ports

HDMI Cable I use to connect my laptop to my TV

Flat Screen TV has HDMI connection in back to connect to Laptop

MP3 Player with USB port, Boombox

USB Stick that I use when copying files from laptop to use in MP3 player

MP3 player I use when hiking. It shuffles the files so I mainly use it for music

Electronic Picture frame has usb port in the back

These are all things I own to utilize the contents of the Christian Library on this USB stick.

I store the contents of the Christian Library on a laptop. Of course, if you do not have enough space on the hard drive, you can just use it to transfer files from one device to another. I have an external hard drive for files too large for my laptop.

I sometimes use my TV speakers for listening to music or sermons from my laptop. I also watch movies going through my laptop to my TV.

What I use the most is the MP3 player (boom box)

From the laptop. I select folders that I want to listen to and copy them to a USB stick. I have a MP3 player (boom box) that I listen to every night. I put the USB stick with the selected folders into the MP3 player. It takes a little bit for me to fall asleep, so I usually at least hear the 1st tract. The next night I may start on tract 2 or 3. Eventually I will have heard all the tracts on the USB stick.
